

JOB CAPTAIN POSITION

Want to design spaces that save lives?

At NEMD we CREATE architecture that WORKS. We are looking for talented architects to join our Providence-based design team. We create healing spaces for some of the biggest names in healthcare - places like Brown University Health, Brigham & Women's Hospital, and Beth Israel Deaconess Hospital.

We design everything from intimate medical spaces that push the boundaries of healthcare delivery to massive hospital complexes that reshape skylines. Every project challenges us to think differently, whether we're figuring out where to put the latest robotic surgery system or designing labs where breakthrough medicines are developed.

We're not just looking for architects - we're looking for problem solvers who get excited about making hospitals less intimidating and medical spaces more human. You'll work on projects from start to finish, so you'll see your ideas come to life (and maybe even save a few lives along the way).

The role commences with six months of in-person training in our Providence, RI headquarters. After training and review of integration, opportunity exists for flexible remote work options. Whether you're fresh out of school or have a few projects under your belt, we'd love to hear from you.

Sound like your kind of challenge? We're currently seeking a Job Captain. The must-haves are solid communication skills and a work ethic that matches our mission.

Responsibilities Include:

- Actively participate in all phases of project development and implementation.
- Prepare presentations, including digital models/rendering.
- Document all project phases from existing conditions to construction details.
- Investigate building materials & systems and medical technology.
- Review of Shop Drawings and Submittals
- Assist with Project Management responsibilities.
- Accompany senior staff at meetings with clients / consultants.
- Travel to project sites throughout RI, CT, & MA (particularly Boston).

Qualifications:

- Professional degree in Architecture or Interior Design.
- 3-5 yrs. professional experience, particularly with construction documents.
- Understanding of commercial building systems, construction methods, and codes.
- Highly competent communication skills, in-person, verbally and electronically.
- Ability to participate in numerous simultaneous assignments, with conscientious attention to schedule and deadlines.
- Proficient in Revit, AutoCAD, MS Office Suite; familiar with Adobe, Bluebeam, Lumion (or similar).

Our Providence office offers a skyline view with a culture focused on collaboration and community. Our Boston office is conveniently located right next to South Station with a view from 30 floors up that'll make you forget you're at work.

Apply: Interested candidates may apply at www.nemd.com/careers or submit a cover letter, resume and portfolio by email to nemd@nemd.com
